

**RIKMD™**

**ROB KELLER MD**

**ORIGINAL GLUTATHIONE FORMULA®**

**PROTECT EVERY CELL  
IN YOUR BODY.**

- ▶ INCREASE GLUTATHIONE
- ▶ BOOST IMMUNE SYSTEM
- ▶ PROMOTE LUNG HEALTH

# RIKMD™

ROB KELLER MD

ORIGINAL GLUTATHIONE FORMULA®

## BENEFITS OF GLUTATHIONE

**BOOST IMMUNE  
SYSTEM**

**PROMOTES  
LUNG HEALTH**

**INCREASE ENERGY  
LEVELS**

**RAISES MENTAL  
CLARITY**

**PROTECTS FROM  
CELL DAMAGE**

**ACTIVATES  
Nrf2**

### Glutathione & Your Good Health

Glutathione is a molecule that is produced naturally, within your own body in a variety of locations. The organ that produces the most glutathione is the liver, and the molecule is composed of three parts: cysteine, glycine and glutamine.

Our founder, Dr. Robert Keller was a passionate researcher who studied the link between reduced glutathione production and many diseases and chronic illnesses associated with aging and cellular oxidation. His patented formula and family of supplements are now used worldwide by former patients of Dr. Keller and customers of RobKellerMD®, who report better health and wellness as a result of our scientifically formulated products.

### Your Health Starts at the Cellular Level

An individual cell is not something that you can feel, but the combined efforts of different types of cells can certainly have a noticeable impact on your day. For instance, when your immune system is compromised and you catch a cold. Or when a small scratch is not healing quickly, or becomes infected. Other signs such as losing hair, brittle nails, dull skin or eyes can all be signs of compromised cellular functioning.

Have you ever felt a cold “coming on” a few days before you got sick? That’s a miniscule change at the cellular level nagging you that something is not quite right.

Remember that even though you may not be able to see it or feel it, your wellness begins below the surface, at the cellular level.

## ORIGINAL GLUTATHIONE FORMULA®

### The Silent War: Cellular Oxidation & Glutathione

Imagine for a moment that there is a constant battle going on inside your body being waged between your cells and oxidation. The functioning of your cells are impaired by the burden of toxins, which can come from a variety of sources in our natural environment including food, air pollutants, heavy metals in the water we drink, medications and personal lifestyle habits, such as smoking.

Even though the average life span in the United States has increased, the actual quality of our lives are impacted significantly by chronic diseases, such as Alzheimer's, Parkinson's, diabetes, over 100 different types of cancer, heart disease and stroke, and inflammatory conditions. What all of these conditions have in common is oxidative stress.

There is literally a war being waged inside your body every day against oxidation. The build-up of toxins at the molecular level have a negative impact on important cell functions. When we are young, our bodies are able to adequately produce enough glutathione (the master antioxidant) to cleanse our cells, and keep them functioning at an optimal level.

As we age, our ability to produce a sufficient amount of glutathione diminishes as we become laden with toxins and oxidants that impede cell performance and the ability to remove these toxins from our body. Without antioxidant support the human body begins to gradually rust from the inside out.

#### Free Radicals and Nrf2

So why isn't Nrf2 always active within our body, helping to remove free radicals and improve immunity? Much like another master antioxidant (glutathione) the ability for Nrf2 to function is greatly impeded by imbalanced nutrition and environmental influences.

Free radicals are singular or grouped atoms that are distinguished by an uneven number of electrons. Damage occurs to these cells when molecules within the cells are exposed to oxygen within the body. When a free radical is created, the cell becomes very reactive and can almost be considered contagious as it seeks out other healthy cells and spreads, impacting cellular membranes and DNA.

Think of free radicals as a domino effect that can dramatically impact your immune system, organ function and ability to fight off more serious chronic inflammatory conditions and cancer.

## Increases Energy and Endurance

Loss of energy and stamina, though often age related, can also be brought about by poor nutrition, lack of proper sleep, elevated levels of physical or emotional stress and depleted Glutathione in your body. Glutathione increases your cells efficiency. The more efficiently each cell in your body operates, the more ATP (energy) it can produce, the more ATP your cells produce, the more energy you will have available. Daily supplementation with Original Glutathione Formula® may help to restore normal healthy levels of Glutathione, restoring your ability to work and play at full capacity.

## Improves Internal Organ Function

It is well known and established that Glutathione is present in every cell in your body, with elevated concentrations present in the tissue of your major internal organs. Glutathione is the body's primary antioxidant and detoxifier, capable of doing the job of all of your body's other available antioxidants.

Glutathione is also the only antioxidant that, once utilized, does not itself become a free radical. If your body's available Glutathione becomes depleted, the ability of your internal organs to counteract free radical damage and eliminate toxins may become compromised.

## Enhances Brain Function

As your body's most important antioxidant, Glutathione is very important in the overall health and peak function of the brain, including memory and mental acuity. The brain consumes more calories per ounce than any other organ in the body, and as a result, is also responsible for an equally high level of free radical formation.

In order for the brain to function at optimum efficiency there needs to be adequate levels of Glutathione available to quench and eliminate these free radicals as quickly as they are formed. Daily supplementation with Original Glutathione Formula® may assist your body in maintaining healthy levels of Glutathione, providing your brain with the resources it needs to operate at optimal efficiency.

## ORIGINAL GLUTATHIONE FORMULA®

# Patented Technology, Glutathione Production & Cellular Protection

Although Glutathione is naturally present in every cell of your body, starting in your early 20's your body's natural production of Glutathione starts to decline by as much as 10% - 15% every decade. Additionally, stress, exercise, infection, injury and environmental toxins can also reduce your body's Glutathione levels.

The super antioxidant supplement Original Glutathione Formula® can elevate your body's Glutathione levels. The result: increased vitality, health and wellness. OGF® is not an oral glutathione supplement but nutritional support that helps your body accelerate its natural production of glutathione, the master antioxidant. Help your body sustain and optimize the production of glutathione and fight cellular oxidation with nutritional support from RobKellerMD®.

Our Original Glutathione Formula® is patented and was formulated with the full recognition of the nature and environment of the digestive tract. OGF® is designed to be broken down by the digestion process.

# RKMD™

ROB KELLER MD

ORIGINAL GLUTATHIONE FORMULA®

## Natural Ingredients, Real Glutathione Production

An important physiological antioxidant and has been shown to regenerate other antioxidants within the body, including alpha-tocopherol (vitamin E).

**VITAMIN  
C**

Has been shown to relieve symptoms of respiratory conditions by acting as an antioxidant and expectorant, loosening mucus in your air passageways.

**NAC**

Natural flavonoid from plants that can act as an antioxidant, neutralizing free radicals that cause cellular & DNA damage.

**QUERCETIN**

Helps prevent certain kinds of cell damage in the body, and also restores vitamin levels such as vitamin E and vitamin C. Alpha-lipoic acid can also recycle "used" antioxidants, including vitamin C, vitamin E, and a potent amino acid compound known as glutathione.

**ALPHA  
LIPOIC  
ACID**

### More Benefits of Increased Glutathione

RobKellerMD® created OGF® with additional components that support enhanced absorption and recycling of the nutrients that are critical to your body's natural capacity to generate glutathione.

Enhances Immune System Function

Increases Energy and Endurance

Helps to Reduce Muscle Ache and Chronic Soreness

Improves Internal Organ Function

Enhances Brain Function

Assists with Toxin Elimination

Enhances Immune System Function

Glutathione levels in the body begins to decline in our early 20's and progressively decline as we age. The cause of this decrease may be the body's inability to produce Glutathione as efficiently as we age or it might be that the body requires more Glutathione as we get older. Interestingly, certain studies have shown that individuals who have lived 100+ years have naturally high levels of Glutathione.

The Original Glutathione Formula® can help you feel and look younger by restoring normal healthy levels of Glutathione. The result? Increased vitality, health and wellness.
